

Tech

An app allowing the user to identify open seats

Kalebrt

Has a check in/ check out system that is requir

Kalebrt

displays the busiest hours of the cafe.

Kalebrt

Can notify the user if an open seat is available.

Kalebrt

can reserve seating, so only a certain number of people can enter.

Kalebrt

Review of the app

Can have a review system sort of how an app asks you to rate it, likes and dislikes

Kalebrt

has a check in with the user ever now and agian

Kalebrt

asks for the users input before certain changes

Kalebrt

allows users to vote for or against a specific change

Kalebrt

Kalebrt

potential issue solvements

allow users to possibly enter if and only if they have a container if they did not set a reservation,

Kalebrt

more seating maybe downstairs if a dish area is added.

Kalebrt

add a time limit for how long a seat can be taken

Kalebrt

larger groups of people are allowed more time

Kalebrt

can leave reviews on how and what to change about the app in the cafeteria or on the app.

Kalebrt

different sections

if someone wants to use the space for studying they must reserve more time and be approved

Kalebrt

bigger groups must be accounted for and are allowed more time when reserved in advance

Kalebrt

people eating alone allowed less time, to get in and get out qucikly

Kalebrt

add a section for the four chair table, can pair up with random people if no single seats are available.

Kalebrt

allow a section that possibly only allows someone in for a short period of time, to get in grab and go.
